Python Django Fresher

8848579887 | aparnap8848@gmail.com | linkedin.com/in/aparna-p5 | github.com/aparnap8848-cmyk

Professional Summary

Python Django fresher with hands-on experience building web applications and REST APIs using Python, Django, and Django REST Framework. Experienced in implementing authentication, CRUD operations, database integration, and user-based data management through academic and personal projects. Currently pursuing Python Django Full Stack Development at Luminar Technolab, with an interest in backend development and problem-solving. Seeking an entry-level Python/Django role to apply technical skills and grow as a developer.

Skills

Programming Languages: Python, SQL, JavaScript
Frameworks: Django, Django REST Framework
Web Technologies: HTML, CSS, Bootstrap
Database: SQLite, MySQL
Development Tools: VS Code, Postman, Git, GitHub

Training

Python Django Full Stack Development **May 2026 – Present**
Luminar Technolab

- Developing practical skills in Python programming, Django, HTML, CSS, JavaScript, Bootstrap and SQL.
- Building web applications and REST APIs with authentication, CRUD operations and database integration.
- Working on hands on projects to improve backend development, API development, debugging, and problem-solving skills.

Projects

Wardrobe Outfit Planner | Python, Django, Django REST Framework, HTML, CSS, JavaScript, Bootstrap, SQLite

- Developed a web-based wardrobe management application using Python and Django to organize and manage clothing items.
- Implemented user authentication and CRUD operations for clothing management.
- Built REST APIs using Django REST Framework for clothing and outfit management.
- Added search and filtering features based on clothing attributes such as category, color, season, and occasion.
- Developed functionality to create and manage outfit combinations for different occasions.
- Used SQLite for database management and Postman for API testing.

Fake Vote Detection Using Face Recognition | Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite

- Developed a web-based voting system using face recognition for voter verification.
- Implemented face matching and OTP-based authentication to verify voters and help prevent duplicate voting.
- Development modules for voter registration, candidate management, party management, and vote management used, Django and SQLite for backend development and database management.

Education

BCA. Bachelor Of Computer Applications **Graduate: 2026**
CSI Christen Muller Women's College Chombala, Vadakara

Certifications & Workshops

- **One-month Hands on Workshop on Python:** Info Campus
- **Python Workshop:** One Team Solutions

Additional Information

- Interested in Python, Django, REST API Development, and Web Application Development.
- Continuously improving programming and problem-solving skills through hands on projects and technical practice.
